

Sagar Gowda G

Cloud Computing Intern — AWS Developer — Frontend Engineer

Bengaluru, Karnataka, India

onlinewithsagar@gmail.com — +91 8747874262 — linkedin.com/in/onlinewithsagar

Professional Summary

Cloud and Web Developer with hands-on experience building scalable applications using modern web technologies and cloud infrastructure. Experienced with serverless architectures and AWS services including Lambda, SQS, API Gateway, and DynamoDB. Passionate about designing efficient digital systems and solving real-world problems through cloud-native technologies.

Core Competencies

- **Cloud Computing:** AWS Serverless Architecture, Cloud Storage, Infrastructure Design
- **AWS Services:** Lambda, API Gateway, SQS, IAM, Secrets Manager, DynamoDB, S3
- **Backend Platforms:** Firebase Authentication, Authorization, Firestore
- **Programming:** JavaScript, Python, Java
- **Frontend Development:** HTML, CSS, TailwindCSS, Responsive UI Design, Three.js
- **Developer Tools:** Git, GitHub, VS Code

Professional Experience

Cloud Computing Intern

Feb 2026 – Mar 2026

ZoomInData

- Worked with serverless cloud infrastructure using AWS services including Lambda, SQS, and API Gateway.
- Built event-driven workflows enabling asynchronous processing using Amazon SQS.
- Implemented API integrations through Amazon API Gateway for scalable backend communication.
- Managed identity and access control policies using AWS IAM.
- Secured application secrets and credentials using AWS Secrets Manager.
- Worked with DynamoDB for scalable NoSQL data storage and retrieval.

Projects

VYBE – Social Interaction Platform

Firebase, JavaScript, HTML, CSS

- Developed a full-stack web platform supporting secure user authentication and authorization.
- Implemented Firebase Authentication to manage secure user login and identity verification.
- Designed protected application routes with role-based access control.
- Integrated real-time database capabilities for dynamic user interaction.

AWS Cloud File Storage System

AWS S3, JavaScript, HTML, TailwindCSS

- Built a cloud-based file storage system leveraging AWS S3 for scalable object storage.
- Developed an intuitive frontend interface for file upload and retrieval.
- Applied secure access policies and bucket configurations.

Smart Traffic Congestion Prediction System

Python, OSMnx, NetworkX, Pandas

- Developed a congestion analysis system for Bangalore road networks.
- Generated road network graphs from OpenStreetMap data.
- Applied graph algorithms to analyze traffic patterns and recommend optimal routes.

Aura AI – Intelligent Content Interface

HTML, TailwindCSS, JavaScript

- Designed a modern AI tool interface supporting multimedia content uploads.
- Implemented dynamic UI animations, hover effects, and responsive layouts.

Education

Bachelor of Computer Applications (BCA)

SSMRV College

Specialization: Cloud Architecture and Cyber Security

2023 – 2026

Certifications

- Implementation of Cloud Solution
- Introduction to Data Center and Cloud Technology
